

Securitas
Technology

Your trusted partner for

Innovative Corrections Security

Our team of correctional facility experts can help you make your facility, your staff, and the offenders entrusted to your care safe and secure.

When you partner with Securitas Technology, you benefit from complex security made easy. You can customize our non-proprietary solutions to meet the specific needs of your facility and also integrate your current systems for comprehensive security control.

With our dedicated and certified service technicians located across the country, we offer national presence with local knowledge. Our technicians specialize in service, maintenance, retrofits, and upgrades specific to the correctional industry. You'll benefit from quick service responses both in person and remotely with remote connectivity.

Securitas Technology never loses sight of what matters most - making your job easier and helping keep your facility safe. As technology advances and security threats evolve, our experts maintain open dialogue with our partners to update systems, increase efficiency, and ultimately help protect staff, visitors, and offenders. When you partner with us, your operations are streamlined by working with a single source for your security needs.

Integrated Security Solutions from a Single Source

NATIONAL PRESENCE, LOCAL KNOWLEDGE

Dedicated, corrections-specific service technicians located across the country

Leading Correctional Facility Security for Decades

Why Securitas Technology Corrections?

EXPERTISE IN THE INDUSTRY

For decades, Securitas Technology has been providing non-proprietary, integrated systems to the correctional facility industry. As the industry's leading provider of electronic security systems, we've partnered with more than 800 facilities in the corrections industry to help make more secure and efficient environments. Our experience allows us to know all aspects of a systems integration project from start to finish.

COMMITTED TO QUALITY

Finding the right systems to secure your facility requires an in-depth understanding. Our security experts will work closely with you to learn your specific requirements and will consider your needs for scalability, functionality, features and any special requirements before proposing the most cost-effective solution.

EXPERIENCED ENGINEERS

The Securitas Technology Correctional Group includes engineers and technicians specialized in the corrections industry. Our engineers are trained and certified in the technologies needed for today's complex correctional security systems for consistent, best-in-class system design.

The Next Generation of Service and Maintenance

Manage and respond to your security needs smarter, faster, and from anywhere with our best-in-class security management platform.

Easily view the information you want, monitor location access and respond to notifications from one centralized location.

24/7 Service Plans

We understand your security in a correctional facility cannot be shut down at night. We can assist you at any time of day - even on holidays - 24/7/365.

Hear It From Our Customers

“We knew we wanted the most advanced security system available. We are so pleased with the final outcome and the flexibility it provides when all the systems are interconnected and working together.”

KATHERINE DIXON, Director of Capital Construction,
Maryland Dept. of Public Safety and Correctional
Services

“This solution has been a godsend, it’s provided peace of mind and allows us to hold essential parties accountable”

TONY WILKES, Chief of Corrections,
Davidson County Sheriff’s Office
