

# Securitas SYNTINEL™

The Integrated Security  
Control Solution

## Next-Generation Security Management

Securitas SYNTINEL™ is the advanced, non-proprietary control platform designed specifically for correctional facilities. Fully customizable and scalable, SYNTINEL™ integrates all your facility's security systems into a single, easy-to-manage solution. Whether modernizing your current systems or implementing a completely new solution, SYNTINEL™ delivers comprehensive security control tailored to your facility's unique needs.

## Comprehensive Integration for Simplified Management

Securitas SYNTINEL™ unites all your facility's security systems into one streamlined platform. It offers full visibility and control with seamless integration of a wide range of products and services, including:

- Intercoms and Paging
- Video Surveillance with Event-Based Call-Up and Playback
- Doors and Access Control
- Utilities and Building Management
- Fire and Duress Alarms
- Pan and Zoom Facility Maps
- Activity Logs and Event Notifications

Optional add-on modules further enhance functionality with:

- Browser-Based Administration Portal
- Maintenance Requests
- Workflow Instructions
- Offender Information Integrations
- Notes Journal for Real-Time Updates

## Key Features

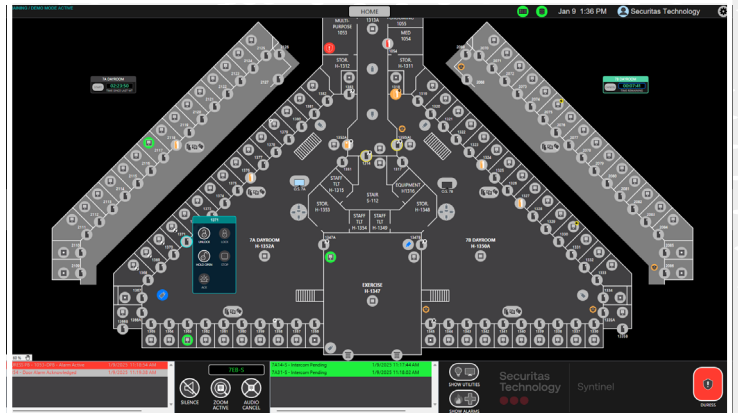

- **Non-Proprietary Design:**  
Enables seamless interoperability with a wide range of devices, reducing system downtime and upfront costs.
- **Multi-Touch Technology:**  
The only complete multi-touch interface on the market, allowing faster response times and enhanced operational efficiency.
- **User-Friendly Interface:**  
Integrates additional systems such as fire alarms, building automation, jail management, and workflow instructions for streamlined management.
- **Robust Data Logging and Reporting:**  
Provides actionable insights into facility trends, maintenance needs, and daily operations in an intuitive, prioritized format.
- **System Health Monitoring:**  
Ensures your system is always operating as intended with real-time notifications of issues, diagnoses, and solutions.

## Benefits of Securitas SYNTINEL™

- **Simplified Touchscreen Interface:**  
Full visibility and control at your fingertips, enhancing ease of use and reducing operator training time.
- **Operational Efficiency:**  
Multi-touch interfaces allow for faster response times, streamlined processes, and reduced workloads.
- **Enhanced Monitoring Capabilities:**  
Navigate facility maps, zoom into specific areas, and access real-time video surveillance for complete oversight.
- **Cost Efficiency:**  
Non-proprietary systems reduce maintenance costs by enabling access to parts and services from multiple vendors.
- **Automation to Reduce Workload:**  
Allows one operator to control the entire facility, minimizing the need for additional staff and improving operational efficiency.
- **Proactive System Health Monitoring:**  
Stay ahead of potential issues with automated alerts, diagnostics, and recommendations to ensure continuous functionality.

## The Future of Correctional Facility Security

Securitas SYNTINEL™ is more than a security platform—it's a transformative solution that enhances safety, efficiency, and accountability within your correctional facility. Fully customizable to your facility's unique layout and operational requirements, SYNTINEL™ provides unparalleled control, visibility, and operational flexibility.
